

NEC Versa LitePad Tablet PC 512-MB Memory Module

The 512-MB Memory Module upgrades the NEC Versa LitePad™ Tablet PC memory from 256 MB to 512 MB. The memory upgrade slot is located on the back of your tablet PC.

See the following procedure to upgrade system memory.

⚠ CAUTION Before handling any internal components, discharge static electricity from yourself by touching a nearby unpainted metal surface.

1. Power off the system, disconnect AC power, remove the battery pack (see Chapter 2 in the *NEC Versa LitePad Tablet PC User's Guide*), and disconnect any peripheral devices.
2. Locate the screw securing the memory bay cover to the bottom of the tablet PC.
Remove the screw and lift off the memory bay cover.

Note Removing the memory bay cover screw requires a very small tip Phillips screwdriver.

Locating the memory bay cover

A – Memory Bay Cover

B – Screw

3. Remove the installed memory module as follows.
 - Press the locking tabs away from the sides of the module until the module pops up at an angle (see the following figure).
 - Pull the memory module out of the slot along the angle and store it in a static-free bag.

Removing the memory module

4. Install the new memory module as follows.
 - Locate the alignment notch on the module. Align the notch with the key in the slot connector.
 - Holding the memory module at a 40-degree angle to the socket, insert the module connector into the socket. Firmly push the module into the socket.
 - Press down on the edge of the memory module until the locking tabs on the sides of the socket snap into place, securing the module.

Installing the memory module

5. Replace the memory bay cover and its screw.
6. Turn the system over. Reinstall the battery pack and reconnect the peripherals and the AC adapter power cable.
