

Versa E120 Product Update Notes

NEC Versa E120 The Ultraportable Notebook

Great News! Your new NEC Versa® E120 notebook now includes a huge 12-inch TFT screen for optimal viewing.

This versatile screen will give you sharp, crisp images and displays of over 65K colors in XGA (1024 x 768) format.

Additionally, the processor for the Versa E120 now delivers more performance with the new low voltage 933-MHz Pentium® III-M processor from Intel®.

To support extra battery life, the Versa E120 has the same second battery option as the Versa E120 DayLite™ that more than doubles total battery performance.

Final note — although other documentation states “Versa E120 DayLite,” the information for that product applies to this notebook also. The only difference is that the Versa E120 has a regular TFT screen for indoor use.
