

NEC ExpressCluster X for Windows R3 (v3.3.3.1) Patch Release Notes

November, 2016

This is a minor update patch release for the ExpressCluster X R3 major release for Windows. This patch release can only be applied to existing installation of ExpressCluster X R3 v3.x versions up to v3.3.0.1.

What's New Since v3.3.0.1

- **For All Editions**
 - Enhanced disk access interoperability with anti-virus software.
 - Enhanced WebManager security to restrict scope of content access.
 - Windows Server 2016 operating system support.
 - Enhanced error processing and recovery for AWS and Azure cloud services.

- **For WAN and LAN Editions**
 - Enhanced automated disk mirroring recovery from network disruption.
 - Windows Storage Space support in mirrored disk resource.

- **For WAN Edition**
 - Enhanced dynamic DNS resource including periodic refresh of dynamic DNS records to avoid scavenging.

How to Obtain

This patch release is available to all customers currently running ExpressCluster X R3 with active maintenance and support service. Please contact support@necam.com with current ExpressCluster X R3 edition and license serial number to obtain the patch release.
